

Hemanth Kumar D

Manufacturing Engineering Manager | Aerospace Manufacturing & Industrialisation | Program Leadership

United Kingdom | hemanth.kumar.sd@gmail.com | +44 7787937133

Professional Summary

Manufacturing Engineering Leader with 13+ years of experience delivering manufacturing engineering, industrialisation, and production readiness programs for global OEMs including Rolls-Royce, Pratt & Whitney, and Safran. Proven record of leading cross-functional engineering teams, driving industrialisation strategies, managing supplier ecosystems, and delivering complex manufacturing programs across safety, quality, cost, and schedule within AS9100-regulated environments. Currently leading manufacturing transformation initiatives onsite at Rolls-Royce (UK).

Core Competencies

Manufacturing Engineering | Program & Project Management | Industrialisation & Production Readiness | NPI & NPD | Manufacturing Governance | Stakeholder & Client Management | Risk & Issue Management | Supplier Development & Governance | AS9100 Compliance | FAI / PPAP / FPQ | Lean Manufacturing | Six Sigma | PFMEA | Root Cause Analysis | Cost Reduction & Capacity Planning | Automation & Process Optimisation | SAP

Professional Experience

Manufacturing Lead – Aerospace Operations | Infosys (Onsite at Rolls-Royce, UK) | Jul 2023 – Present

Lead manufacturing engineering and industrialisation programs supporting Rolls-Royce production operations across safety, quality, cost, and delivery metrics.

Manage program governance including maturity plans, risk registers, technical readiness reviews, and cross-functional delivery alignment.

Drive automation, process optimisation, and capacity improvement initiatives to enhance shopfloor productivity and operational performance.

Act as primary manufacturing interface with OEM stakeholders for production readiness, issue resolution, and manufacturing performance reviews.

Support capital investment and automation business cases using consolidated technical, operational, and cost data.

Serve as Delegated FAI Approver responsible for PPAP documentation, contractual data packs, and compliance to AS9100 quality standards.

Senior Manufacturing Engineer – Program Lead | Tata Advanced Systems Ltd. | Jan 2018 – Jun 2023

Led industrialisation and NPI programs for composite aero-engine components supporting Rolls-Royce and Pratt & Whitney platforms.

Managed OEM technical engagement including FAI approvals, audits, configuration management, and engineering change implementation.

Directed supplier and internal manufacturing readiness activities including PFMEA, process qualification, and production ramp-up.

Delivered Lean transformation, cost-reduction, and CAPA initiatives improving throughput, yield, and cost performance.

Led cross-functional engineering teams across manufacturing, tooling, quality, and supply chain to ensure program milestones and delivery schedules were achieved.

Manufacturing Engineer – Project Execution | Safran HAL Aircraft Engines | Jul 2014 – Dec 2017

Supported manufacturing engineering execution for Silvercrest and LEAP aero-engine assembly programs.

Conducted FPQ, process validation, configuration control, and manufacturing risk assessments supporting AS9100-compliant production readiness.

Coordinated design, tooling, and production teams to resolve manufacturing issues and support engineering change implementation.

Supported customer audits, qualification activities, and production acceptance reviews.

Methods Engineer – Process Improvement | TE Connectivity | Jan 2012 – Jul 2014

Delivered FPQ and NPI support for automotive sensor manufacturing programs for Audi platforms.

Implemented Lean Six Sigma initiatives including line balancing, SMED, and Kanban systems improving cycle time, throughput, and line efficiency.

Supported process capability improvement, production ramp-ups, and supplier readiness initiatives.

Education

B.E. Mechanical Engineering – New Horizon College of Engineering, Bangalore

Additional Information

Primarily targeting Manufacturing Engineering Manager and Industrialisation Leadership roles, with secondary interest in Aerospace Program Management opportunities across the UK.
